DETAILED ACTION

Claim Rejections - 35 U.S.C. § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 13-19 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification does not substantially disclose a third layer on the core of the golf ball. There is an option of providing additional layers (spec 9 line 5) but there are no specific details given regarding the characteristics. Particularly there is no mention of the Shore D hardness being less than the second layer (claim 13) or the thickness (claim 15). Furthermore, there is no mention of the specific gravities in claim 16 or the materials in claim 18.

Allowable Subject Matter

3. Claims 1-12 are allowed.

Response to Arguments

4. Applicant's arguments and declaration has been fully considered but they are not persuasive. Applicants' argument is based on the premise that although two core layers and two cover layers were originally disclosed in the instant application, the innermost cover layer may nevertheless be considered simply an outermost core layer. Applicants state that there is no substantial difference between what has been disclosed as an inner cover layer, and, what the patent with which applicants seek to provoke an interference, discloses as an outer core layer, citing similar materials and compositions in the compared layers. However, this position is at odds with that taken by the applicants in paper 6 where applicants argued that prior art showing a three piece core and a cover is "*completely distinguishable*" from the ball of the applicants' claims, (emphasis added). (See paper 6 remarks pages 4-6). These remarks were made in an attempt to overcome a prior art rejection. Under file wrapper estoppel doctrine applicants are estopped from now arguing that the inner cover layer may be considered an outer core layer or vice-versa.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 3711

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
